Uzbekistan Republic President by acceptance done row decisions young people economic socialization process to encourage directed . In particular: PQ-3213 of July 27, 2017 “Youth’s economic activity increase and employment to provide circle additional measures about”. decision young people to entrepreneurship attraction to do business start for comfortable conditions create, study programs work exit and qualifications to increase directed. This in the decision young people to entrepreneurship attraction to do business start for comfortable conditions create, study programs work exit and qualifications to increase directed one row important the rules set given In this of young people business start for comfortable conditions create, tax privileges giving loans cheapening and state by displayed services simplification such as measures done increase.

Society complicated alive organism be his stable development human being factor with depends. In it people age, profession, gender in society passing to processes relationship, material and spiritual riches in creation aspirations and another row aspects with they differ. The same at the time of their such relations own from himself spontaneous way is not formed, but one from the side, them of a person life to forgive for necessary material and spiritual needs to action brings, the second from the side, state, society organizations and another social institutions by take to go education and education tools is activated. They are under the influence of human being mind, outlook is formed and always improved goes These two factor how much high level developed if so, of people activity and to them suitable progressive found keeps going Therefore, socio-economic activity society and state interests suitable respectively consistency with development requirement does This is too much important activity country to the youth is directed.

Young people society and country in his life family member, certain nation, people representative of the country citizen, material and spiritual riches create activity, that or this idea and to ideology relationship with to himself special status have has been independent group as all in processes, their society in his life material and spiritual riches in creating, various socio-economic processes and institutions in the activity conscious respectively participation to do to understand can Of young people socio-economic activity provide, society and country today and prospect for important important have Because in them to himself special enthusiasm, novelty aspiration material and spiritual riches in creating practical importance occupation is enough.

Study programs improvement: To young people modern requirements answer giving professional skills teaching, economic literacy increase business manage the basics to teach directed study programs work exit and practical training strengthen.

Qualification increase: of youth employment provide, their professional skills increase, new occupations mastery and competitiveness to increase directed qualification increase programs create such as issues decision performance in providing important role played.

PQ-4752 dated May 12, 2020 “Youth economic to the activity wide attraction to do and them to support circle addition measures about”. decision young people for work places create, their employment provision, entrepreneurship activities development and innovative ideas to support directed.

Uzbekistan young people economic socialization model the following of the elements consists of:

Education system modernization do: Education system variable economic to the circumstances suitable coming modern knowledge and skills to give orientation need It is practical training strengthening, innovative technologies application to students business the basics to teach and economic literacy increase own into takes this fight his own vital to the experience have not in the country free activity for created of possibilities using material welfare for work to do wanting or to him competence not enough young people mother so the idea and ideologies to the effect down are staying.

That’s why for young people education education attention strengthen them to the field of science attraction to reach, empty times efficient organize reach duties important importance occupation is enough.

Therefore, our country leader Shaukat Mirziyoyev today’s Uzbekistan to the youth big attention is looking at them believes and hope declares: “Our country young people between science, education, medicine, culture, literature and art, sport, work release, military service in the fields, in general, all on the fronts enthusiasm showing coming citizen our boys a lot They are his own physical and spiritual potential , talent and skills manifestation reach for necessary conditions by creating to give regarding in our country a lot affairs is being done and them in the future of course continue we will deliver”

Especially today information, that is different idea and ideologies young people between of popularization all technical and technological tools imagination by doing not to be, high level development their own disgusting goals looking forward to evil intending to the forces hand is coming They are such from tools one was all for information and different the news get possible and the Internet contact tools Mastery with are using Professional orientation and qualifications Development: Youth economic to the activity suitable coming occupation in choosing help give, their qualifications increase and competitiveness ability development important important have.

To work placing services development: To young people work in search of help give , work places create, their employment provide and professional skills increase according to programs development need.

Economical culture Formation: In youth economic literacy , financial knowledge , investments and business to manage was concepts formation important important have This is a lesson programs, seminars, conferences and public information tools through done increase can.

Summary instead of that's it to emphasize should be Uzbekistan young people economic socialization model state of politics important direction being his efficiency of the economy stable development and of society well-being in providing important role plays President decisions performance, education system modernization to do, professional orientation development, entrepreneurship support, work placing services improvement and economic culture formation of young people economic socialization successful done to increase service does In this the following to recommendations action to do recommendation will be:

Of young people economic socialization process regularly monitor regularly and analysis to do.

Economical socialization to the model state of politics another including directions (for example, health preservation, culture and social protection).

Of young people economic socialization according to international experiences learning and assimilation.

Young people with in cooperation economic to socialize directed programs and projects done increase.
